

# FAB LAB

## GOVT POLYTECHNIC COLLEGE PALAKKAD

A Fabrication Laboratory (FabLab) is a technical prototyping platform where people can design and build their own technology.

Fab labs aim to provide stimulus for local entrepreneurship and serves as a platform for learning and innovation. Fab labs are designed in a way that people with minimal training can come and work on developing their own technology for personal or commercial use. Fab Labs also becomes a medium for connecting to a global community of learners, educators, technologists, researchers and innovators – essentially becoming a self-sustaining global knowledge sharing network.

A Fab Lab consists of state-of-the-art digital fabrication tools such as 3D printers, laser cutters, CNC routers, electronics workbench, PCB milling machine, vinyl cutter etc. Allowing anyone to express their ideas through technology. With the support of Government of Kerala, Kerala Startup Mission has setup a Fab lab in association with the Govt Polytechnic college palakkad.

### **COME FOR A VISIT**

A Fab lab Visit provides an opportunity to explore the various fabrication possibilities of a fab lab. Contact:8891198969,8089777242.
